1. Program to find sum and average of two numbers.

2. C program to find cube of an integer number using two different methods.

3. Program to calculate simple interest.

4. C program to check whether a person is eligible for voting or not?

5. C program to read marks and print percentage and division.

6. C program to convert temperature from Fahrenheit to Celsius and vice versa.

7. C program to calculate X^N (X to the power of N) using pow function.

8. C program to calculate HCF of two numbers.

9. C program to multiply two numbers using the plus operator.

10. C program to demonstrate examples of floor and ceiling functions.

11. C program to convert feet to inches.

12. C program to find the sum of all numbers from 0 to N without using a loop.

13. Calculate the distance between two cities from kilometers to meters, centimeters, feet and inches using the C program.

14. C program to find the area and perimeter of the rectangle.

15. C program to find quotient and remainder

16. C program to print ASCII values of all digits using goto statement.

17. C program to print ASCII values of all lowercase alphabets using goto statement.

18. C program to print 1, 11, 31, 61, ... 10 times using goto statement.

19. C program to calculate compound interest.

20. C program to print weekday of given date.

21. EMI Calculator (C program to calculate EMI).

22. Age Calculator (C program to calculate age).

23. C program to swap first element with last, second to second last and so on (reversing elements).

24. C program to find nearest lesser and greater element in an array.

25. C program to merge two arrays in third array which is creating dynamically.

26. C program to delete prime numbers from an array.

27. C program to check prime numbers in an array.

28. C program to find second largest elements in a one dimensional array.

29. C program to find two largest elements in a one dimensional array.

30. C program to find second smallest element in a one dimensional array.

31. C program to find two smallest elements in a one dimensional array.

32. C program to calculate Sum, Product of all elements.

33. C program to swap adjacent elements of a one dimensional array

34. C program to find occurrence of an element in one dimensional array.

35. C program to delete given element from one dimensional array.
